1 About these instructions for use

Trade mark rights exist for this document; for further information, go to viega.com/legal.

1.1 Target groups

The information in this instruction manual is directed at the following groups of people:

- Heating and sanitary professionals and trained personnel

Individuals without the abovementioned training or qualification are not permitted to mount, install and, if required, maintain this product. This restriction does not extend to possible operating instructions.

The installation of Viega products must take place in accordance with the general rules of engineering and the Viega instructions for use.

1.2 Labelling of notes

Warning and advisory texts are set aside from the remainder of the text and are labelled with the relevant pictographs.

DANGER!

This symbol warns of possible life-threatening injury.

WARNING!

This symbol warns of possible serious injury.

CAUTION!

This symbol warns of possible injury.

NOTICE!

This symbol warns of possible damage to property.

This symbol gives additional information and hints.

1.3 About this translated version

This instruction for use contains important information about the choice of product or system, assembly and commissioning as well as intended use and, if required, maintenance measures. The information about the products, their properties and application technology are based on the current standards in Europe (e.g. EN) and/or in Germany (e.g. DIN/DVGW).

Some passages in the text may refer to technical codes in Europe/Germany. These should serve as recommendations in the absence of corresponding national regulations. The relevant national laws, standards, regulations, directives and other technical provisions take priority over the German/European directives specified in this manual: The information herein is not binding for other countries and regions; as said above, they should be understood as a recommendation.

1.4 Other applicable documents

The instructions for use of the Advantix drain or the Advantix stacking element must also be strictly observed for the mounting of the tileable Advantix top.

2 Product information

2.1 Certification

Data acc. to DIN EN 1253, Table 7

manufacturer	Viega Holding GmbH & Co.KG
manufacturer identification mark	
Certificate of conformity	
Address	Viega Technology GmbH & Co.KG Viega Platz 1 57439 Attendorn Germany
Relevant standard	DIN EN 1253-2
Load class	K3
Product class with respect to temperature behaviour	A

2.2 Intended use

2.2.1 Areas of use

The Advantix top is intended for insertion of a 5–30 mm thick covering made of tiles or natural stone. Use only in combination with an Advantix drain or an Advantix stacking element for bonded sealing.

2.3 Product description

2.3.1 Overview

Fig. 1: Scope of delivery

- 1 Tiling aid
- 2 Grate (tileable)
- 3 Site protection
- 4 Inlet element

3 Handling

3.1 Assembly information

3.1.1 Installation dimensions

Fig. 2: Installation dimensions

3.2 Assembly

3.2.1 Mounting the grate

- Minimum and maximum size of the plate cover.

INFO! Drainage capacity with 5 mm inlet gap 0.4 l/s. Drainage capacity with 8 mm inlet gap 0.5 l/s.

- The height of the tileable plate.
Dimension of the inlet gap: 5-8 mm.

- Remove the site protection.
- Determine the screed height.

- Shorten the inlet element.
Upper edge of screed = upper edge of flange
- Fit the inlet element into the drain unit.
Upper edge of screed = upper edge of flange
- Install the inlet element with backflow seal.

INFO! Line the flange.

- Use screed to plaster the flange.

- Remove the protective foil and the site protection after the screed has hardened.
- Use the tiling aid.

- Tile the floor up to the tiling aid.

- The lengths of the tile squares can be 88-94 mm.
- The thickness of the tiles can be 5-30 mm.

- Apply the tile adhesive to the grate.

- Press the cut out tile into the tile adhesive.
- Align the tile parallel to the grate.

- Remove the tiling aid.
- Determine the installation height up to the upper edge of the the tiles.

- If necessary, cut the tiled grate to tile-level.

- Fit the tiled grate into the stacking element or into the drain unit.

3.2.2 Care

NOTICE! Risk of damage due to unsuitable cleaning agent.

The following cleaning agents can damage chrome-plated surfaces and therefore may not be used:

- scouring agent
- abrasive sponges
- lime, plaster or cement dissolver
- solvents or other acidic cleaning agents

Normal soap or a mild cleaning agent can be used for regular care and prevention of lime scale. Under no circumstances should scouring agent or scratching objects be used.

Strong stains, even around the drain unit and the siphon, can be removed using typical household cleaner. Please note that the cleaning agent must be rinsed off thoroughly with clear water after the prescribed soaking time. There should be no residue on the components.

3.3 Disposal

Separate the product and packaging materials (e. g. paper, metal, plastic or non-ferrous metals) and dispose of in accordance with valid national legal requirements.
